## FOR PLATFORMS, WALKWAYS AND CAR PARKS

Size	Product Code	Pallet Qty
10kg bag	110160	80
3kg dispenser	110199	180

### Product Description

Magic Ice Melt Original is a free flowing, fast acting solid de-icer in the form of white 'prills' or granules. The product is completely harmless to humans and animals and will not attack fabrics or metals, thus allowing application without the need for protective clothing. Magic Ice Melt's free flowing properties means it can be applied sparingly, ensuring maximum economy.

### Storage

All packaging types are waterproof and can be stored outside if necessary. Bags and buckets once opened should be well sealed after use to ensure free flowing product at all times.

### Safe for children and animals

Magic Ice Melt is completely non-toxic to humans and animals and will not irritate the skin.

### Does not harm plant life

When properly dispensed Magic Ice Melt will not burn or otherwise damage lawns, shrubbery or other plant life. The product is also fully biodegradable.

### Does not damage carpets or flooring when walked inside

Magic Ice Melt is a clean white prill that does not leave unsightly stains on soft furnishings when tracked inside. Unlike rock salt neither will it leave scratch marks on polished flooring typically found in receptions areas and classrooms.

### Clean, light and easy to apply

Magic Ice Melt is a light, free-flowing product that is very easy to scatter, particularly when applied with the specialist dispenser also available from Basic Solutions. No protective clothing is necessary as the product will neither irritate the skin nor damage shoes or clothing.

### Exceptional coverage

Due to its light, free flowing properties, Magic Ice Melt gives exceptional coverage, particularly when applied through the dispenser. Applied sparingly as directed, allowing the granules to bore through the ice and work from beneath, 10 kg of product is enough to cover up to 2000m<sup>2</sup>.

### Will not corrode metals or concrete

Magic Ice Melt is completely non-corrosive to metals and concrete, an important factor in why it is the de-icer favoured by airports and railways worldwide.

### Applications

Magic Ice Melt can be used on paths, stairs, stairwells, playgrounds, playing fields, all-weather pitches, car parks, fire escapes, driveways, roads, bridges, forecourts, runways, platforms, construction sites, drill rigs, ports, piers, retail parks and any other area that requires a fast acting, non-toxic, non-corrosive and easily applied de-icer.
